EDUCATION

Fast Nuces **Lahore, Pakistan**

B.S in Computer Science ***Expected Graduation, June 2026***

- **Concentrations:**Data Science ,AI ,Web development
- **CGPA:** 3.14/4.00, *Dean's List in 2nd Semester*
- **Related Coursework:** Data Mining,Data Structures & Algorithms, Object Oriented Programming,Database Management, Statistics & Applications,Theory of Automata,Operating Systems,Computer Organization and Assembly Language

SKILLS

Programming: Python,MongoDB, SQL,Numpy,Scikit-Learn,Pandas,Matplotlib,C++, C
Tools: Visual Studio Code, PyCharm, Jupyter Notebooks, GitHub,Ubuntu,SQL server

EXPERIENCE

CO-LLISION Coworking Space —Lake City, Lahore, Pakistan
Operations Intern (Aug 2024 – Nov 2024)

- Improved client satisfaction through daily interactions, building strong communication and stakeholder management skills.
- Collaborated with cross-functional teams to design and launch a website, enhancing coordination and project execution abilities.

PROJECTS

Air Quality Index Predictor — Nairobi, Kenya ***Python, MongoDB, ARIMA***

- Developed an **autoregressive model** using time series data from MongoDB, predicting air quality with **~88%** accuracy at specific times.
- Enhanced model performance by **15%** through **hyperparameter tuning**, providing real-time, accurate air quality forecasts.

Earthquake Damage Predictor — Nepal (2015 Earthquake) ***Python, SQL, Logistic Regression, Decision Tree***

- Built **logistic regression** and decision tree models to classify earthquake damage, achieving a prediction accuracy of **~90%** using data from a SQL database.
- Incorporated **ethical considerations** by ensuring model fairness and minimizing bias, helping to provide equitable disaster response insights.

Customer Segmentation — United States ***Python, KMeans, PCA, Dash***

- **Built a KMeans clustering model** to segment customers, utilizing feature selection based on variance and dimensionality reduction via **PCA** for improved model performance.
- **Designed and deployed a Dash web app** to visualize customer segments, and evaluated model effectiveness using **precision and recall metrics**.

Gig Generator **NextJS,MongoDB.Tailwind,CSS**

- **Developed a full stack** marketplace for users to post,view and update gigs.
- Posted Gigs were assigned to the admin with the most relevant experience.

Food Ordering Website **PHP,SQL**

- **Developed a fully functional online platform** allowing customers to register, browse restaurant menus, and place orders, integrating with a backend SQL database.
- **Created admin functionality** for order management, including delivery tracking and menu updates, streamlining restaurant operations.

CERTIFICATIONS

- **Intro to Data Science by SimplyLearn**
- **Applied Data Science Lab –** ***WorldQuant University*** (In Progress) 7/8 projects completed.

ACTIVITIES AND LEADERSHIP

Softec **FAST Lahore**

Deputy Head AI Competition *March 2024*

- Manage the AI event for Softec ensuring all processes were run smoothly and candidates were assessed fairly on the given task by Industry specialists.
- Got to learn some valuable insights and different approaches to assess a problem and communicate results efficiently.
